Heading down in the morning and we are available the entire day. Because Wednesday is so jam packed we wanted to visit some of the site areas on Tuesday

Thank you for the update Jason. Although Tuesday would work for me, I'm not sure if Nidal would be available, but I can find out. What is your schedule for Tuesday?

Carol

Right now we still have our morning call. It may change though. Sorry for the uncertainty on this. Is there any chance you are available on Tuesday?

Thanks
Jason

Good afternoon Jason. I figured I would drop you a line to see if you might have a better idea regarding whether or not you will be meeting with the Water Districts during the morning of April 17th, or if you might have some time to meet with us.

Thanks,
Carol

Carol:

Do you know when you are getting into the Bethpage area on April 17?

I now have a meeting with the Town at 1:00. I am thinking this is going to tie me up until about 3:00.

Thanks,

Jason

Thank you Jason. I look forward to meeting with you. I will touch base with you again in early April to coordinate a meeting/ field visit with you for April 17th.

My recollection is that the Navy normally sends out an agenda to its mailing list a few weeks prior to its RAB meetings. Would it be best for me to reach out directly to the Navy contact (Brian Murray) to ask to be included on the mailing list?

Thanks,
Carol

Carol:

Thanks for the email and update. I will be at the April 17 RAB meeting. Right now we do not have specific plans that afternoon and am thinking that we could either meet to discuss the project and/or visit some of the locations where field activities are occurring.

Thanks and lets coordinate a meeting as the date approaches.

Jason

Good morning Jason. As you may have already heard, a transition is underway for transferring the NWIRP and Grumman Bethpage sites from EPA's Superfund program back to EPA's RCRA program. It looks like I will be the EPA lead, and I am in the process of coordinating with Lorenzo Thantu on the upcoming transfer. I had been involved with this project from the late 1990s until early 2018, and I am looking forward to returning. Although it has been over two years since I have been assigned to NWIRP-Bethpage, I try to read whatever news articles I can about this project. Based on recent discussions, my understanding is that although the federal role has been substantially decreased, EPA still needs to have a general knowledge of the project.

Lorenzo mentioned that the Navy is planning a Restoration Advisory Board meeting for the evening of Wednesday April 17th. It looks like my Section Chief, Nidal Azzam will be able to attend the RAB meeting. Although unfortunately I cannot be available the evening of April 17th, I can be available that day. If you plan to be at the site during the day on April 17th, I was wondering if you might be available to meet with me (and probably also Nidal) to take a look at some of the field work that currently is being done in the project area? If you have plans to review the study area with the Navy on Apr 17th, we would be happy to tag along if that works for you. This would help me to brush up on the project and it would provide Nidal with an introduction.

Regards,

-Carol-
